

MESA MOM capability maturity level

Task:

The students should investigate how the maturity level of a MOM implementation can be estimated. Work is ongoing within the MESA organisation and the document "MESA MOM Capability Maturity level" will soon be published. The document is based on the ISA95-Part3 standard. The students should speak with a MOM vendor in order to understand why and this is of importance. Further, they should interview the MOM vendor and receive feedback on the document, the focus should be on Production Operations (chapter 5.1).

Documents available:

- "MESA MOM capability maturity level", to be published by MESA
